```swift
class Enemy{
    //Propeties, Variable
    var health = 100
    var attackStrength = 10

    //Method, Function
    func move() {
        print("Walk forwards.")
    }

    func attack(){
        print("Land a hit, does\(attackStrength) damage")
    }

}
```
